

# PASS FOR EXTINGUISHING A FIRE

## **Pull the pin.**

This will allow you to discharge the extinguisher.

## **Aim at the base of the fire.**

If you aim at the flames (a frequent temptation), the extinguishing agent will fly right through and do no good. You want to hit the fuel.

## **Squeeze the top handle or lever.**

This depresses a button that releases a pressurised extinguishing agent in the extinguisher.

## **Sweep from side to side.**

Do this until the fire is completely out. Start using the extinguisher from a safe distance away, then move forward. Once the fire is out, keep an eye on the area in case it re-ignites.
